## // PROFESSIONAL SUMMARY

Senior UX Designer with 10+ years of experience building customer-centred products across enterprise IoT, fintech, SaaS, and consumer platforms. Thrives in ambiguous, complex problem spaces: working backwards from customer needs to define experience vision, drive design strategy, and ship products that measurably improve engagement and task efficiency. Proven track record presenting and defending design decisions to senior stakeholders, leading end-to-end design from user research through engineering handoff, and using real usage data to inform iteration. Expert in interaction design, usability testing, design systems, and WCAG 2.1 accessible interfaces. Works across Scrum and Lean UX environments with cross-functional product, engineering, and executive teams.

## // WORK EXPERIENCE

### Senior UX Designer

Aug 2020 – Present · Pune, India

Globant

Enterprise IoT · Fintech · SaaS, 6 projects delivered across web, iOS, and Android

- Led end-to-end experience design across 6 enterprise products, starting with customer problem definition, working backwards through research and iteration to ship solutions that drove a 35%+ engagement lift and 2.5-second reduction in task completion time.
- Analysed real usage data and site metrics alongside usability findings to identify customer drop-off patterns; translated insights into design optimisations validated through A/B testing and iterative prototyping.
- Presented and defended design decisions to product and engineering leadership across 8+ cross-functional teams; maintained design direction under stakeholder pressure while incorporating evidence-backed feedback.
- Governed 4+ design systems; drove adoption of visual design guidelines and interaction patterns across product teams, accelerating engineering handoff and ensuring consistency at scale.
- Ran Scrum-integrated design sprints, including sprint planning, backlog grooming, and retrospectives, ensuring design velocity matched engineering delivery cadence.

### Senior UX Consultant

Mar 2020 – Aug 2020 · Pune, India

Thought-Craft

B2B Enterprise Applications

- Translated B2B enterprise requirements into UX scenarios, task flows, and product workflows; created storyboards to communicate design intent to stakeholder and engineering teams.
- Produced low- and high-fidelity prototypes in rapid iteration cycles, validating interaction models and reducing design ambiguity before development handoff.

### Senior UX Designer

Dec 2019 – Feb 2020 · Pune, India

Innoplexus

AI-driven Pharma Data Products

- Designed wireframes, mockups, information architecture diagrams, and UI pattern libraries for AI-driven pharma data platforms.
- Built rapid prototypes to translate complex AI concepts into testable visual assets, enabling the product team to converge on design directions faster.

Senior Interaction Designer

Feb 2019 – Oct 2019 · Pune, India

Ogee Studio

Cybersecurity B2B Enterprise

- Designed enterprise cybersecurity interaction models by translating security domain requirements into UX scenarios, task flows, and storyboards mapped to expert user mental models.
- Maintained design consistency across multiple B2B application suites through iterative stakeholder review cycles and documented interaction patterns.

UX Designer, Lead on DiGiSense (Mahindra Design Partner)

Feb 2018 – Feb 2019 · Pune, India

Extentia Information Technology

Enterprise B2B: Connected telematics platform deployed across 28,000+ Mahindra tractors

- Led first-ever consumer research for DiGiSense: 44 field interviews across 5 states in 4 languages, identifying that 50% of features were unknown to users and the dealer onboarding moment was the structural root cause of adoption failure across 28,000+ deployed units.
- Worked backwards from customer reality to redesign the geofencing flow from 37 clicks / 350 seconds to a 3-step mobile-native interaction; rebuilt the dashboard from 16 equally weighted features to 5 prioritised elements using progressive disclosure driven by actual usage patterns.
- Presented research findings and strategic recommendations (including a SIM card infrastructure change) directly to Mahindra senior leadership; defended data-backed design decisions against existing product assumptions, shifting the product team's understanding of the adoption problem.

Interaction Designer

May 2016 – Oct 2017 · Pune, India

Ogee Studio

Cybersecurity: 3 Projects including NETSCOUT PFS ONE

- Defined and drove the experience vision for NETSCOUT PFS ONE, a global enterprise visibility fabric platform, designing lifecycle-based navigation, perspective-based left panel, and staged topology publishing that shipped as core product architecture deployed across enterprise data centres worldwide.
- Navigated high-stakes design decisions for zero-error-tolerance expert users; produced detailed UI specifications for engineering, presented design rationale to product leadership, and maintained design direction through multiple review cycles across a one-year engagement.

// EDUCATION

Bachelor of Design  
(User Experience Design)

Symbiosis Institute of Design, Pune  
2012 – 2016

// BEYOND THE BRIEF

SID · Symbiosis Institute of Design

Visiting Faculty · External Jury  
Programme Review Committee  
Since 2023

Analyzethis.ai

Ideator · AI Product Strategy  
Since 2025
