PROFILE

Lead UX Designer with 10+ years shipping high-stakes B2B SaaS, fintech, and IoT products. I work at the intersection of systems thinking, UX strategy, and AI-augmented workflows. I've built design systems that teams actually adopt, led cross-functional teams of 8+, and consistently delivered measurable engagement improvements. I design for outcomes, not optics.

EXPERIENCE

Lead UX Designer

2022 – Present

EXTENTIA EXPERIENCE STUDIO

- Led UX for Siemens Xcelerator — enterprise SaaS platform serving 800+ engineers; redesigned core configuration workflows reducing task time by 40%.
- Architected and shipped a multi-product design system adopted across 3 product teams with full token governance and Figma component library.
- Managed a cross-functional team of 8 designers, researchers, and content strategists embedded within Agile engineering squads.
- Introduced AI-augmented research synthesis workflows, cutting synthesis time from 3 days to 4 hours without sacrificing signal fidelity.

Senior UX Designer

2019 – 2022

EXTENTIA EXPERIENCE STUDIO · MAHINDRA & PFS ONE

- DiGiSense (Mahindra): Led 44-farmer field research across 5 states. Redesigned IoT telematics app, recovering 29% user drop-off and increasing feature discovery by 35%+.
- PFS ONE (Network Infrastructure): Rethought visibility fabric for zero-margin-error infrastructure management used by enterprise network administrators globally.
- Established design QA processes and design-dev handoff standards adopted studio-wide.

UX Designer

2015 – 2019

EARLIER ROLES · FINTECH & SAAS

- Designed financial products including lending dashboards, transaction monitoring interfaces, and compliance tools for fintech clients.
- Shipped 4+ design systems across enterprise products, establishing component libraries, token systems, and documentation standards.
- Conducted usability studies, contextual inquiries, and heuristic evaluations — translating research into shipped product decisions.

SELECTED WORK

01 Siemens Xcelerator · Enterprise SaaS

Redesigned core UX of an enterprise configuration platform serving 800+ engineers. Led strategy through delivery across 14 months.

PRINCIPLES

- Design for the person using it, not the person reviewing it.
- Systems thinking first. Visual execution second.

- Decisions without data are guesses. I prefer signals.

02 DiGiSense · IoT Telematics

28,000+ connected tractors, 50% feature unawareness, 29% abandonment.
Field research across 5 states. Redesign that moved every metric.

MOBILE

FIELD RESEARCH

03 PFS ONE · Network Infrastructure

Complete rethink of a visibility fabric tool for network administrators. Zero-margin-for-error environment. Decade-old system, one year to redesign.
